

Paolo Gontero

San Giovanni Battista (Molinette) Hospital - University of Turin
School of Medicine, *Turin, Italy*

Paolo Gontero holds the position of Full Professor of Urology at the University of Turin School of Medicine and Chairmen of the Division of Urology, San Giovanni Battista (Molinette) Hospital, Turin, Italy.

His main clinical interests are in the field of Surgical Uro-Oncology, devoted to Robotic and Laparoscopic oncological surgery of prostate, kidney and bladder cancers. He has expertise in minimally invasive live donor nephrectomy and reconstructive surgery of transplanted kidney.

He has authored and co-authored more than 300 publications in international journals with his main research interests pertaining the development of new treatment modalities for non-muscle invasive bladder cancer and prostate cancer. He is Scientific Director of the "Torino Prostate Project", a multidisciplinary clinical and research working group in the field of prostate cancer. He is involved in international trials and working groups on the development of new diagnostic and therapeutic modalities for prostate cancer and on the assessment of surgery in high risk and recurrent prostate cancer.

He is chairmen of the Course on Small Renal Masses at the European School of Urology and holds active membership with EORTC-GU and EMPACT. He has co-authored several book chapters and edited several books, including "Problem Based Urology", Springer 2013, awarded by the BMA Book Award as highly commended in surgical specialties and "Treating Urothelial Bladder Cancer", Springer 2018. He is a panel member of the European Guidelines for non-muscle invasive bladder cancer.
